## QUAD CLOSE TRAP SEAL DEVICE

### **The Answer to Infrequently Used Floor Drains and Sewer Gas Odors**

The Quad Close Barrier Type Trap Seal Device creates a watertight seal inside the drain hub, outlet piping, or throat of the strainer.

**MORRIS GROUP**  
INTERNATIONAL

## A Reliable Solution –

In protecting the trap seal.

## Easy to Install –

In the floor drain, not the plumbing system.

## A Value for the Purchaser –

Saves water and is easier to maintain than a trap primer.

The Quad Close Barrier Type Floor Drain Trap Seal Device is for use in the floor drain outlet or the throat of adjustable strainer to:

1. Minimize the evaporation of the trap seal for the floor drain,
2. Prevent the emission of sewer gases, and
3. Diminish the backup of raw sewage into a building.

## Quad Close Trap Seal Device Installation Instructions

Fig. No.	A (Pipe Size)	B
2692-02	02(50)	2 3/4(70)
2692-03	03(75)	2 3/4(70)
*2692-0350	0350(89)	2 3/4(70)
2692-04	04(100)	2 3/4(70)

INSTALLATION: The 02 (50), 03 (75) & 04 (100) trap seal sizes install in the drain outlet and inside PVC or cast iron pipe. The 0350 (89) trap seal size installs in the throat of adjustable strainers. For drain installations, simply insert the trap seal in the drain outlet until the trap seal is either flush with the bottom of the drain or top of outlet piping. \*For strainer installations, insert the trap seal as low as possible into the throat of the strainer.

Categories	Quad Close Trap Seal Device Overview—Fig. #2692
<b>Function:</b>	The purpose of the trap seal is to minimize the evaporation of the trap seal for the floor drain. It will open to allow the flow of drainage and close when there is no flow. The trap seal is for use in the floor drain outlet or the throat of adjustable strainers.
<b>Performance:</b>	The 2692 Quad Close Trap Seal has been evaporation tested for thousands of hours with very little loss of water due to evaporation.
<b>Material:</b>	The Quad Close Trap Seal is made from a chemically resistant elastomer.
<b>Features and Sizes:</b>	<p>Designed to handle a wide range of pipe and internal drain body diameters. It can be retrofitted into existing drains. Available in 2", 3", 3-1/2", &amp; 4" sizes.</p> <p>For drain installations, simply insert the trap seal in the drain outlet until the trap seal is either flush with the bottom of the drain or top of outlet piping. *For strainer installations, insert the trap seal as low as possible into the throat of the strainer.</p>
<b>Benefits:</b>	If sewer gases are escaping into the room due to the lack of water to maintain a water seal in the floor drain trap, this device can easily be inserted into the drain to prevent evaporation of trap seal water and to prevent sewer gases from escaping into the room. It will help mitigate backflow.

# STINK STOPPER

## QUAD CLOSE TRAP SEAL DEVICE

1.

*SEWER GAS EMISSIONS ARE A REAL PROBLEM.*

2.

*THIS IS A JOB FOR THE STINK STOPPER!*

3.

*THE STINK STOPPER IS INSERTED INTO THE STRAINER THROAT....*

4.

*AND SEWER GAS EMISSIONS ARE SEALED OFF.*

## Quad Close Trap Seal Device Advantages:

- IAPMO Listed, File No. 7479—Manufactured to the requirements of ASSE 1072.
- Reduces the frequency needed for the periodic admission of water into the floor drain's trap to maintain a seal.
- Easily removed for inspection and cleaning.
- Hold up to 10.00" of back pressure and can help prevent back flow.
- Will close completely with a very small amount of back pressure.
- Can be specified for use in drains installed in areas of infrequent use; the Quad Close complements floor drains that have been specified with a trap primer connection.
- Thicker and more durable than other trap seals, as such is less vulnerable to UV, chemicals, cuts and tears.
- Works in the retrofitting of existing drains.
